President’s Report 2026

This past year at Golden Square Kindergarten has been one of stability and focused preparation for the future. While it has been a comparatively quiet year in terms of major disruptions or sweeping changes, this steady rhythm has been a positive. It has allowed our kinder to operate smoothly and enabled our team to focus deeply on what matters most: providing an exceptional early learning environment for our children.

Behind the scenes, the Committee of Management has been firmly focused on the horizon. We have officially kicked off major initiatives to begin significant landscaping works, ensuring our outdoor spaces continue to evolve, inspire, and safely engage our children. Furthermore, we have commenced critical preparations for the introduction of the pre-prep cohorts starting in a couple of years. This proactive planning will lay the essential groundwork to ensure a seamless and successful transition for our entire kinder community.

As we hold this Annual General Meeting, I will be officially stepping down from my role as President. Serving on the committee of management has been a genuine privilege, and I want to take this opportunity to express my deepest gratitude.

To our wonderful teachers and educators: thank you. Your unwavering dedication, passion, and the exceptional care you bring to the kindergarten every single day are what make this place so special. The positive impact you have on our children's early years is profound and lifelong.

To my fellow volunteer committee members: thank you for so generously giving your time, skills, and energy. It takes a highly dedicated village to keep our kinder running smoothly, and your hard work behind the scenes is deeply appreciated.

I leave this role exactly as I entered it, with the absolute certainty that Golden Square Kindergarten does and will continue to provide the best and most supportive environment for our children in the region.

Thank you all for your continuous support, and I look forward to watching our kinder continue to thrive in the years to come.

Ben Kemp

President, Committee of Management
